WHAT IT SOLVES

All the air a demanding PC needs

Four ARGB fans
Three at the front and one at the rear, all 120 mm, factory-fitted and with addressable lighting.

Tempered-glass side
The left panel is tempered glass with four screws, and the chassis interior is black.

Mesh front
High-flow mesh instead of a closed panel: the front fans draw air without obstruction.

USB-C at the front
One USB Type-C and two USB 3.0 on the front panel, plus the audio output.

The mesh front: many cases close the front with a plastic or glass panel: it looks good, but the fans end up drawing air through a side slot. Mesh lets air through the whole surface, so the three front fans deliver the flow they can really move.
