WHAT IT SOLVES

Speed, contrast and a stand that adjusts

240 Hz with 1 ms

Fast VA panel that reaches the highest refresh rate in the line, over HDMI 2.1 or DisplayPort 1.4.

4000:1 contrast

Deep VA-panel blacks, with 350 nits and 119% sRGB coverage.

AMD FreeSync Premium

The top tier of the standard: it syncs and also compensates when frame rates drop.

Height, swivel and pivot

A stand with all three adjustments: it rises, swivels 20° each way and rotates 90° to work in portrait.

What "Premium" adds: standard FreeSync syncs the monitor's refresh rate with the graphics card. FreeSync Premium also requires a high minimum refresh rate and adds low framerate compensation: when FPS drop below the range, the monitor repeats frames so the image does not stutter. It shows exactly in the most demanding moments.

WHERE IT DELIVERS

Built for the fast match and the long workday

COMPETITIVE GAMING

Two hundred and forty frames
