RGB GAMING MOUSE PAD

TE-3020G

80 × 30 cm · 14-mode RGB lighting · rubber base

14-MODE RGB LIGHTING
With a control button and memory of the last mode

An 80 × 30 cm mouse pad: it covers keyboard and mouse on the same surface. 14-mode RGB lighting with its own control button, a non-slip rubber base and a textile surface for an even glide.

THE WHOLE DESK ON THE SAME SURFACE

REFERENCE IMAGE

SIZE	RGB MODES	THICKNESS	BASE
80 × 30 cm	14	3 mm	Rubber

WHAT IT SOLVES

Surface, grip and lighting in one piece

80 × 30 centimetres
The keyboard fits with plenty of room left for the mouse: the desk gains an even surface.

14 lighting modes
Fourteen RGB effects around the edge, with adjustable brightness and the option to switch them off completely.

Its own control button
Change the effect, adjust the brightness and turn off the light from the pad, with no software to install.

Rubber and textile
The rubber base does not slide on the desk and the textile surface gives an even glide.

The control button: one press changes the lighting mode, two adjust the brightness, and holding it for three seconds turns the RGB on or off. The pad remembers the last mode used, so when the computer is switched back on it looks as it was left, without repeating the setup.

WHERE IT DELIVERS

Built for the desk where you play and work

GAMING SETUP

One surface for everything

80 cm of width fits the full keyboard and the wide mouse movements that low-sensitivity gaming calls for.

- 80 × 30 cm
- Textile surface
- Printed design

WORK DESK

Tidy, with or without lights

The same piece works in a home office: the RGB switches off with the button and leaves an 80 cm black surface.

- RGB can be switched off
- Adjustable brightness
- 3 mm thick

SMOOTH TABLES AND GLASS

It does not slide when you move the mouse

The rubber base grips melamine or glass, where a thin or baseless pad ends up shifting with use.

- Rubber base
- Non-slip
- 12-month warranty
