WHAT IT SOLVES

Posture changes once the screen goes up

Eight angles

Eight fixed positions to choose height and tilt to suit the chair, the desk and each person's height.

180 grams folded

Folded, it measures 15.6 cm and weighs less than a large phone: it goes in the backpack with the laptop.

Silicone pads

The silicone stops the device slipping and protects the laptop's cover from scratches.

Zinc alloy · 5 kg

Metal structure, not plastic: it holds up to 5 kilos, with margin for any 19-inch laptop.

ACCTE7023N

Screen height: working on a laptop resting on the desk forces you to look down and bend your neck for hours. Raising the screen to eye level is the simplest posture correction there is. When you do, it is worth adding an external keyboard and mouse, because the built-in ones end up high.

WHERE IT DELIVERS

Built for those who work for hours on a laptop

LAPTOP WORK

A straight neck all day

Raises the screen to eye level and corrects the posture of anyone who spends the day on a laptop resting on the desk.

- 8 adjustable angles
- Notebooks from 14" to 19"
- For tablets too

WORK ON THE MOVE

Travels with the laptop

Folded, it takes up as much as a glasses case and weighs 180 grams, so it goes with the laptop to a client's office or the café.

- 15.6 x 4 x 4 cm folded
- 0.18 kg
- Zinc alloy

VIDEO CALLS

The camera stops looking up at you

With the laptop raised, the camera sits at face height instead of pointing upwards, the usual awkward framing.

- Up to 5 kg
- Silicone pads
- 12-month warranty
