WHAT IT SOLVES

One piece for work and for the street

Two ways to carry it
The straps come off: a backpack on the street and a shoulder bag at the office.

Padded compartment
Its own padded space for a laptop of up to 14.1 inches, apart from everything else.

USB charging port
An internal cable carries the charge from a power bank stored inside to the outside port.

Water repellent
Polyester exterior with a PU coating: light rain runs off instead of soaking the fabric.

The USB charging port: the backpack has no battery of its own. The outside port is linked by an internal cable to the compartment, so you plug a power bank in there and the phone charges without opening the backpack. The power bank is sold separately.
